End Of Life (EOL) date for Druva inSync On-Premises (On-Prem, Private Cloud) is March 31, 2021. After this date, all support services for the product will be unavailable, and the product will become obsolete. For more information, submit a case with Druva Support.

Druva is excited to announce the release of inSync 5.9.6. Building on the vision of data availability and governance for the mobile workforce, inSync 5.9.6 broadens the capture of data attributes to better align with EDRM (Electronic Discovery Reference Model) and U.S. Securities and Exchange Commission (SEC) recommended metadata for investigations and eDiscovery needs. Additionally, with newly-added granular device data capture controls, inSync 5.9.6 gives IT better management and visibility over endpoint data to support their BYOD (Bring Your Own Device) initiatives.

The inSync On-Premise 5.9.6 documentation is applicable for the On-Premise v5.9.7 patch, v5.9.8 patch, v5.9.9 patch, v5.9.9 HotFix 5, and v5.9.9 HotFix 8 release as well.
