Change user provisioning method

Overview

inSync provides the option to change a configured user provisioning method to other supported user provisioning methods while preserving the user's backed-up data.

Change the user provisioning method

- Change user provisioning from AD/LDAP to Azure AD
- Change user provisioning from AD/LDAP to SCIM
- Change user provisioning from Azure AD to AD/LDAP
- Change user provisioning from Azure AD to SCIM
- Change user provisioning from SCIM to AD/LDAP
- Change user provisioning from SCIM to Azure AD
